April 2026

“Accurate diagnosis, trusted results, better health outcomes.”

DR. NIKUNJ JAIN

CO-FOUNDER AND HOD - NUCLEAR MEDICINE

With April, the month of renewal and new beginnings, it is a reminder to put our health first and be aware and responsive with time. The modern, highly dynamic medical environment has made effective diagnosis and early diagnosis the cornerstone of effective treatment and improved health outcomes.

We are dedicated to providing the best diagnostics and nuclear medicine services in Molecular Diagnostics and Therapy. Through a patient-centric method of approach combined with state-of-the-art technology, we deliver accuracy, safety, and comfort throughout. We are not concentrated on diagnostics only, but give people clarity, confidence, and care, offering it to all those who place their health in our hands.

We know that medical tests may be so stressful at times. This is the reason why our competent team is committed to providing stress-free and hassle-free experiences, timely reports, professional consultation, and compassionate care. All the patients receive compassion, respect, and individual care at our diagnostic centre.

We take pride in offering our dedication towards community health, as we did our recent health camp at the TATA Steel, Sahibabad, where we conducted health check-ups for 3000+ employees. These initiatives strengthen our faith in preventive healthcare and early diagnosis in minimising health risk and enhancing the quality of life.

As medical professionals, we are sure that prevention and awareness are as crucial as treatment. We have a reason to pursue the finest ideals of integrity, transparency, and care because of your trust.

We hope you find our Newsletter informative and useful.

We would be so pleased to hear your opinion and feedback at info@molecularit.com

Stay Healthy, Stay Aware!!!

Take Charge of Your Health with Molecular Diagnostics and Therapy – Early Detection Starts Here

Your health is your most valuable asset, but when you have busy schedules and daily chores, you tend to push it to the back burner.

Most health conditions are undetected as they do not have many or any symptoms in the initial phases. When the signs manifest, the condition might demand more complicated treatment. That is why it is not an isolated importance when timely diagnosis is necessary: it is a necessity.

Molecular Diagnostics and Therapy is determined to ensure that you remain updated, offering to be proactive and confident in your health. With sophisticated diagnostic technology and quality care, we are providing you with exact outcomes at the time when it counts the most.

Why Early Diagnosis is the Key to Better Health?

Early diagnosis is very important in the detection of diseases before they escalate. It is either a minor infection or a serious medical condition, but whenever they are detected at the appropriate time, they can greatly enhance the treatment results.

Periodical diagnostic testing is useful in:

- Early detection of health problems.
- Lessening the chances of complications.

- Facilitating quicker and more efficient treatment.
- Bringing peace of mind with timely health information.

Symptoms should not be disregarded or tests delayed as they may result in undue risk. Acting early is always a wiser and more cautious thing to do.

Symptoms You Should Never Ignore

Our body can also provide us with warning signals when something is wrong. Being sensitive to these cues would enable you to respond in time.

Watch out for:

- Constant headache or dizziness.
- Senseless tiredness or feebleness.
- Loss of appetite or sudden loss of weight.
- Throbbing pain or discomfort in the abdomen.
- Pain or stiffness in the joints.
- Breathing difficulties or chest pains.

In case you have any of these symptoms, it is better to visit a doctor and, in order to avoid further complications, undergo the prescribed diagnostic tests.

Advanced Diagnostic Services We Offer

We strive to offer the strongest diagnostic services at Molecular Diagnostics and Therapy in order to present accurate and efficient outcomes.

DIGITAL PET Scan (Positron Emission Tomography):

PET-CT scans are imaging tests, which offer a detailed description of the functioning of the tissues and organs which aid in the diagnosis of cancer and also in the measurement of disease progression. At Molecular Diagnostics and Therapy, **PET-CT scans are available starting from ₹ 9,999***, making advanced imaging more accessible and affordable.

CT Scan (Computed Tomography):

CT scans allow detailed cross-sectional viewing of the body and help in the detection of infections, tumors and internal trauma. They assist in proper diagnosis and following up on the success of the treatment.

MRI (Magnetic Resonance Imaging):

MRI is a powerful imaging method which gives detailed images of the brain, spine, organs and soft tissues, with a combination of magnetic fields and radio waves. It does not rely on radiation and is particularly effective in the diagnosis of neurological conditions, injuries, and chronic diseases.

Ultrasound & X-ray:

Widely used diagnostic tools include ultrasound and X-ray, which are speedy and effective means

of imaging. They aid in the identification of a broad spectrum of diseases, such as bone injuries, organ abnormalities and other internal health-related problems.

Pathology & Blood Tests:

Pathology services are very important in the diagnosis of diseases and in health check-ups. They assist in the detection of conditions like diabetes, thyroid disease, infections and other underlying health issues through blood tests and specialised tests.

What Makes Molecular Diagnostics and Therapy Different?

We realise that the location to select a diagnostic centre is not a trivial undertaking. We not only specialise in providing reports, but also confidence and compassion at Molecular Diagnostics and Therapy.

The following is what you can look forward to us doing:

- **State of the art Technology:** Has state-of-the-art machines to be able to produce accurate images and tests.
- **Professional Staff:** Senior radiologists and technicians.
- **Fast, Accurate Reports:** Accurate on-time reporting.
- **Patient-Centric Approach:** No hassles at any point throughout.
- **Excellent Safety and Hygiene:** Providing a hygienic and clean environment to all patients.

We intend to achieve the provision of quality healthcare that everyone can rely on.

Preventive Health Checkups – A Smart Investment

One of the most effective methods of being ahead of possible health problems is preventive healthcare. Regular health checkups can be used to identify issues at an earlier stage rather than relying on the onset of symptoms to expose the underlying issues.

Our health checkup packages are aimed at:

- Give a full history of your health.
- Detect hidden conditions at an early stage.
- Assistance in monitoring your health.
- Direct you into a healthy lifestyle.

You can afford to invest in preventive health today to save you from significant health issues in the future.

Simple Tips to Stay Healthy

Although diagnostic tests are necessary, it is important to pursue a healthy lifestyle as well. Some of the basic habits that you can use are as follows:

- Consume a healthy and well-balanced diet.
- Stay physically active.
- Consume a sufficient amount of water during the day.
- Get adequate rest and sleep.
- Manage stress effectively.
- Do not engage in bad habits such as smoking and taking alcohol in high doses.

These habits may result in a considerable change in overall wellness when done consistently.

When Should You Get Tested?

You should consider diagnostic tests when:

- They are recommended by your doctor.
- You are experiencing strange or chronic symptoms.
- Family history of some diseases.
- You desire to keep a check on an existing state.
- You are scheduled to do a regular check-up.

Early testing results in early cure, and that can be everything.

Take the First Step Towards Better Health

Your wellness should be warranted and taken care of. Molecular Diagnostics and Therapy exist to assist you with the right diagnostics, excellent technology, and care at our core.

Do not wait until it becomes worse. You can take control of your health today. Book your diagnostic test with Molecular Diagnostics and Therapy and move one step closer to a healthier future.

Stay Healthy, Stay Aware!!!

OUR TECHNOLOGY

We are equipped with the latest and high-quality machines to provide proper diagnosis and accurate results.

DIGITAL PET-CT (Positron Emission Tomography – CT):

DIGITAL PET-CT system, is a modern imaging technology that assists in detecting cancer in its early stages, staging, and measuring treatment response.

CT Scan (Computed Tomography):

Our centre has a **uCT 520 CT Scanner**, which provides rapid and accurate cross-sectional images to identify infections, tumors, and internal damage.

MRI (Magnetic Resonance Imaging):

Siemens MAGNETOM Sempra 1.5T MRI System

It offers radiation-free and high-resolution imaging of the brain, spine, joints, and soft tissues, and is used at our diagnostic centre.

Ultrasound:

We have advanced **Mindray Ultrasound Systems (Resona 19 and DC-80 X-Insight)** that provide real-time, high-quality imaging of abdominal scans, pregnancy, and soft tissue imaging.

Digital X-Ray:

The **MI 400 HF Digital Radiography** system, which offers both fast imaging and high-quality images, in addition to low radiation exposure, is used at our diagnostic centre in an effort to protect the patient.

Health Camp Initiative – TATA Steel, Sahibabad, Ghaziabad

Molecular Diagnostics and Therapy has organized a successful health camp within TATA Steel, Sahibabad, Ghaziabad, Uttar Pradesh, to fulfill our obligation of disseminating awareness of preventive health care and early diagnosis. The camp provided a good variety of diagnostic and screening tests, such as ECG, Pulmonary Function Tests (PFT), Audiometry, Blood Tests, Digital X-Ray, Doctor Consultations, and Eye Check-ups. The camp operated under a group of qualified personnel in terms of its smooth operation, and this was facilitated by a team of professional doctors, technicians, and healthcare professionals.

This project also contributed significantly to the awareness of the significance of regular health check-ups, particularly among working people who mostly ignore the symptoms early because of their hectic work schedules. We also removed typical barriers of being able to access diagnostic services, like accessibility and time, by taking them to the workplace, successfully covering 3000+ employees. We, at Molecular Diagnostics and Therapy, have a firm belief in preventive care as the basis of healthy living. By doing so, we still encourage early diagnosis, lessen health risks, and promote wellness within society.

Patient Experience

Mr. Ram Milan – PET-CT Scan ★★★★★

“I visited the centre for a PET-CT scan as advised by my doctor. I was quite nervous initially, but the staff was very supportive and guided me throughout the procedure. The scan was conducted efficiently, and the team ensured I was comfortable at all times. My reports were delivered promptly, which helped in timely medical decisions. Overall, it was a very reassuring experience.”

Mr. Alok – PET-CT Scan ★★★★★

“My doctor recommended that I get a PET-CT scan, and I chose Molecular Diagnostics and Therapy based on their reputation. The entire process was smooth and well-managed. The staff explained every step clearly, which helped me feel relaxed and less anxious. The centre was clean and well-organized, and I received my reports on time. I truly appreciate their professionalism and care.”

Mr. Makkhan – PET-CT Scan ★★★★★

“I underwent a PET-CT scan at Molecular Diagnostics and Therapy, and the experience was very smooth. The staff was polite, professional, and made sure I understood the procedure. The facility maintained high standards of hygiene, and everything was handled efficiently. I did not have to wait long, and the reports were accurate and timely. It’s a place you can trust for quality diagnostic care.”
