- MBBS - Rajiv Gandhi Medical College, Thane - DNB in Nuclear Medicine
- KEM Hospital & Seth G.S. Medical College, Mumbai (Awarded President's Gold Medal)

About

Dr. Ashmi Agarwal is highly qualified in nuclear medicine, working for over 10 years with advanced imaging and nuclear medicine. She is currently a consultant with Molecular Diagnostics and Therapy, where she assists in providing correct and patient-centered diagnostic treatment. In 2009, she graduated with an MBBS from her home college, Rajiv Gandhi Medical College in Thane, and studied nuclear medicine (DNB) at KEM Hospital and G.S. Medical College in Mumbai. During her training, she was awarded the President's gold medal due to her excellent grades.

Dr. Ashmi has served in several best hospitals in Mumbai, like Kokilaben Dhirubhai Ambani Hospital and Bombay Hospital and Research Centre. She was also leading the nuclear medicine department at House of Diagnoses at Faridabad, where she had been working for almost two years before relocating to Molecular Diagnostics and Therapy. Dr. Ashmi was a highly qualified expert with extensive experience and is reputed to have a high level of proper diagnosis score, a warm and professional nature, and patient care ethics. She is an author of numerous articles published in international peer-reviewed journals as well as a medical researcher.

Dr. Ashmi continues to offer high-quality nuclear medicine care in the latest technology at Molecular Diagnostics and Therapy to assist the doctor and the patient in making better decisions based on accurate imaging and dependable reports.
