

**MOLECULAR****DIAGNOSTICS AND THERAPY**

...where technology meets patient care

Dr. Nupur Jain

MBBS, MD OBS GYN

Co-Founder and HOD-OBGYN (Radiology)

About

Dr. Nupur Jain is the Co-Founder and Head of OBGYN (Radiology) at Molecular Diagnostics and Therapy and Molecular Pathlabs, both prestigious units of Vitrana Healthcare LLP. Renowned for her in-depth knowledge in the field of Obstetrics and Gynecology, Dr. Nupur Jain has spent over two decades working towards improving women's health. A leading-ranked graduate of the prestigious Maulana Azad Medical College (MAMC), New Delhi, she holds her MBBS and MD degrees from one of the world's pre-eminent medical centers, where she was awarded a gold medal in recognition of her academic accomplishments. Ardent in her dedication to women's medical excellence, she pursued her DNB in Obstetrics and Gynecology, which included her residency training in Lok Nayak Hospital, Delhi.

Dr. Nupur Jain's remarkable expertise in the field of ultrasound and sonology is well supported by her extensive exposure in fetal medicine and medical ultrasound by virtue of advanced courses in the Master's in Gynac USG & Fetal Medicine for a span of one year, the Randhawa Fetal Echo course, the Fetal Echo from Apollo course, the 3D USG Master's course, and the Dr. S. Pradeep Fetal Echo Master course. Dr. Nupur Jain is one of the most reputable OBGYN specialists in the country of India for her strong reliance on empowering women through early diagnosis.

Visionary Leadership, Dr. Nupur Jain is one of those important pioneers in her field, who established the Radiology and Gynecology centers of Molecular Diagnostics and Therapy, bringing it to the doorstep of patients in far-off places like India. Her medical facility, La Sante, has managed to provide a patient-centric experience to women, focusing on high technology in medical fields, making them self-capable of taking charge of their own health.

Dr. Nupur Jain is a recipient of numerous accolades, with an ever-relenting pursuit towards academic excellence, and her work in fetal medicine has made her one of the most sought-after professionals in the field. A highly acclaimed academician and clinician, she changed the face of OBGYN diagnostics, ensuring that women receive nothing but the best. Her vision at Molecular Diagnostics and Therapy is one where healthcare is being redefined to make advanced diagnostics accessible, and a world where every woman deserves and gets the care she warrants. Dr. Nupur Jain bases her commitment on women's health, which inspires her patients and her peers with a dedication beyond boundaries.
