About

As a Vice President of Operations at Molecular Diagnostics and Therapy, Mr. Vishal Gupta is responsible for ensuring that the operations at his company are of a high standard. This is particularly important at his center located at Green Park, South Delhi. Before joining his current company, Mr. Gupta worked in a career that is relevant to his current job.

Before he joined Molecular Diagnostics and Therapy, he had experience in high-ranking positions as an operational leader, for instance, as the Senior Technical Superintendent at Fleet Management Limited, wherein he handled operations with finesse. Another experience he had was as the AVP of Operations & Engineering at Jones Lang LaSalle.

Mr. Gupta's career journey exemplifies his dedication to operational integrity and his emphasis on optimizing resources for exceptional levels of patient care. With his engineering background and rich experience in operations, Mr. Gupta emerges as a prominent force in achieving efficiency as well as quality for the organization. No less a personality for his leadership and devotion to his job, Mr. Gupta is a vital force behind the mission of accessible and dependable health care services through Molecular Diagnostics and Therapy.
